Pat:

Here is our response relative to the questions raised in your email and  
supporting document:

OSF Open Rec. Capgemini -CIO Email Correspondence Aug -Oct 2010

With regards to the BDNA inventory of assets based on the taxonomy, we are on the same page. I can confirm that Capgemini will be providing as part of the project plan, a comprehensive inventory of the assets identified and categorized within the taxonomy or framework. At a minimum, it will contain the data elements depicted in your illustration. The inventory collection and aggregation within the taxonomy will be the used in the analysis phase to identify redundancies and targets for standardization and reduction of cost.

Capgemini has incorporated into our project plan, 4 - 2 day workshops with up to 40 participants in each work shop, around the theme of Enterprise Governance. The outcome of these workshops is to foster collaboration between state agencies, and gain consensus on an Enterprise Governance Framework / Model for adoption and implementation by the Office of the CIO. I will be driving this issue as part of the project planning and PMO process.

I hope this provides you with the level of clarity and comfort that you were looking for.

Regards,

Bob

Subject: Re: Updated BDNA Documents for Oklahoma

Thank you for the information on BDNA. The product was near as extensive as I thought it would be. My expectations are that we would get an exhaustive inventory of IT assets based on a technical framework (taxonomy), and that we would have a recommended governance process that would help us standardize over time. I would like to know if you expect to deliver the detail I am looking for and how that would be done. (see attached document for clarification)

Subject: FW: Updated BDNA Documents for OK  
Importance: High

Here are the correct documents and versions based on the updated information:

1. Strategic Discovery Client Preparation Document and secure data access transfer methods
2. BDNA Level 2 commands
3. BDNA Analytics Report
4. Taxonomy Grouping of Software Components
5. Understanding Discovery WP Final
6. Cisco Switch Details

Did you also send additional info regarding the network analysis? I did not see it in your emails to pat and alana, perhaps I missed something?

Pat:

Here is our response relative to the questions raised in your email and supporting document:

with regards to the BDNA inventory of assets based on the taxonomy, we are on the same page. I can confirm that Capgemini will be providing as part of the project plan, a comprehensive inventory of the assets identified and categorized within the taxonomy or framework. At a minimum, it will contain the data elements depicted in your illustration. The inventory collection and aggregation within the taxonomy will be the used in the analysis phase to identify redundancies and targets for standardization and reduction of cost.

Capgemini has incorporated into our project plan, 4 - 2 day workshops with up to 40 participants in each work shop, around the theme of Enterprise Governance. The outcome of these workshops is to foster collaboration between state agencies, and gain consensus on an Enterprise Governance Framework / Model for adoption and implementation by the Office of the CIO. I will be driving this issue as part of the project planning and PMO process.

I hope this provides you with the level of clarity and comfort that you were looking for.

Regards,

Bob

Thank you for the information on BDNA. The product was near as extensive as I thought it would be. My expectations are that we would get an exhaustive inventory of IT assets based on a technical framework (taxonomy), and that we would have a recommended governance process that would help us standardize over time. I would like to know if you expect to deliver the detail I am looking for and how that would be done. (see attached document for clarification)

Alana:

Jose is on the west coast today and we have a time zone impact.

Jose indicated that the signed confidentiality agreement was faxed to your office on Friday. Jose will be at an office within the next 3 hours and can re-fax the document to you if needed.

I am attaching a highlighted copy of our redacted file. All customer reference contact information has been highlighted. The client names remain, just the key reference contact within the client organization has been highlighted for redaction.

The registration filings with the Secretary of State Office have been made and we are expecting the document certifying our good standing today. Upon receipt of this document, we will amend it to our registration materials.

The limitation of liabilities clause is a bit complex and I will call you to discuss this in greater detail.

Please let me know if you have any questions.

Bob

Bob

We spoke to our legal department and they have advised us that we should not include language that limits the liability. On August 6th Jose accepted the State of Oklahoma's limitations of liability per the attached email. Does your legal department have a problem with it? When do you expect to have the contract review done?

OSF Open Rec. Capgemini -CIO Email Correspondence Aug -Oct 2010  
when you come in today I want to get with you about your revised redacted  
(confidentiality) file and find out where you are with registering with  
the Secretary of State.

Thanks Bob.

Subject: CIO Study Contract - Change

Alana:

with respect to the limitation of liabilities clause, will you consider  
adding back something similar to the following. The objective is to  
establish the limitation at the contract value. See the highlighted clause  
below:

while the parties to this agreement acknowledge the Attorney General's  
Opinion, the Parties further recognize that Supplier disagrees with the  
Attorney General's Opinion and contends that contractual limitation of  
liability provisions such as the one contained in this agreement are  
enforceable and do not violate the State Constitution, the liability limit  
will be established as the contract value (\$999,900).

We appreciate your consideration of this change.

Regards,  
Bob

Hello Alex,

Thanks for the your time again today. As discussed I've attached the California IT plan document as well as the Little Hoover Commission Report. The plan is somewhat dated but is still very relevant. I think you'll find it interesting reading.

I'm looking forward to working with you and your team.

Cynde,

BDNA is currently working through a database issue on their gear. They hope to have more information within the hour. They may require a replacement drive be shipped overnight and installed tomorrow or Monday. Scans for OSF cannot begin until this issue is resolved.

Thanks,  
Jayson

Alex:

I will have the team prepare a traceability matrix to insure all of the elements defined in the RFP are being captured through the survey process.

Bob

Alex -

I'll work closely with Bob Sausa upon his return next week to ensure all these are addressed in the Survey/Questionnaires that go out to the agencies. I want to also add that a lot of interviews are already occurring with OSF State Leads to incorporate their thoughts and comments on all models of the templates. The team will send for approval from you, Joe and Pat before dissemination to the agencies and universities. We also need to discuss how this manual data will be captured and involve team members from Security. I have already had suggestions from them to try and use the OSF Sharepoint as with the Risk Assessment Survey but do not know if that will be a pliable solution for this project. We can discuss early next week.

Have a great weekend -

Cynde

Here is the list I came up with after a cursory review.

- 1) printers,
- 2) copiers
- 3) facsimile
- 4) mobile devices
- 5) system management
- 6) development environment
- 7) certifications of employees
- 8) assessment of project management, software development, and architecture
- 7) purchasing spending and budgeting practices
- 8) governance practices

Subject: IT Security Spend as a percentage of total IT Budget

Related to the conversation about IT Security as a percentage of IT spend, I just ran across the following on CIO web site:  
How Much Should You Spend on IT Security?  
It may be difficult for enterprises to figure out how much they should spend on IT security, but research analyst Gartner has statistics on how much their peers are spending. By Jeremy Kirk  
Wed, September 22, 2010  
Leave a comment

IDG News Service - It may be difficult for enterprises to figure out how much they should spend on IT security, but research analyst Gartner has statistics on how much their peers are spending. Security is a trade-off between risk and cost, and enterprises in different industries may spend more or less depending on their situation, said Ian Reeves, a managing vice president for Gartner Consulting. A survey of 1,500 or so companies worldwide found businesses spend an average of 5 percent of their total IT budget on security, according to Gartner's IT Key Metrics Data for 2010. Gartner also broke it down to security spending per employee, which averaged around US\$525 annually in 2009, compared to \$636 in 2008 and \$510 in 2007. Of the total IT security budget, 37 percent is spent on personnel, 25 percent on software, 20 percent on hardware, 10 percent on outsourcing and 9 percent on consulting. Companies should not necessarily worry if spending is higher or lower than the average, Reeves said. A more important question is why the spend is at a certain level and whether that is good or bad, Reeves said. It's possible to spend a fortune on security, but if it's done poorly, it doesn't help a business, said David Lello, a director at Gartner Consulting. The general drivers for security spending include targeted malicious software attacks, cybercrime, regulation, remote access and new delivery models for services, such as cloud computing and software-as-a-service. Companies ranked intrusion detection and prevention as the top security priority, followed by patch management, data loss prevention, identity management and antivirus. Professional services is the sector that has the highest number of employees dedicated to IT security, followed by government, banking and financial services,

Subject: FW: NASCIO Security and Privacy Committee - Call Reminder and  
Materials for Today's Call -- Tuesday, September 21  
S&P Committee Members:

During today's monthly call, Chris Buse mentioned that he had seen an excellent summary of federal legislation relating to security and privacy issues and urged those on the call to take a look at this on the web, if interested. I asked him to forward the link, which is included below. I know Chris follows security legislation pretty closely, and appreciate the input. Thanks Chris!

Subject: NASCIO Security and Privacy Committee - Call Reminder and  
Materials for Today's Call -- Tuesday, September 21

S&P Committee Members:

This is a reminder that the next meeting of the committee is scheduled for this afternoon, Tuesday, September 21st at 1 PM Eastern Time.

Please use the following dial-in information to participate in the call:

Phone: 866 699-3239

Access Code: 29353251

As announced last week, today's primary agenda item will consist of a presentation by Srini Subramanian, which will include a preview the Deloitte-NASCIO 2010 State CISO Survey and discussion of individual reports Deloitte will provide to State CISO's prior to the survey release

OSF Open Rec. Capgemini -CIO Email Correspondence Aug -Oct 2010  
next week. Attached please find a PowerPoint that will be used in this  
discussion.

I hope you will be able to join us for the call this afternoon. Thanks.

Jose:

I hope your travels to/from Europe were uneventful, and that you get a chance to spend some time back at home over the weekend.

I made a few "executive" decisions here this morning to address some issues brought to my attention by Pat Elwood, and ask that you will support them. I will not make a habit of doing things like this, but this is in response to a conversation I understand Robert and Pat had earlier this week to address some problems and team dynamics that could prove detrimental if not addressed quickly.

First, I've asked my team to schedule daily "scrums" (an approach most often associated with extreme Programming (XP), where teams meet every morning to identify what didn't get done from the day before, what is to be done today, and what issues need to be overcome to accomplish the objectives for that day). We will be holding these meetings from 7:30 to 8:00 Monday through Friday, I'd like to ask that the Cap folks participate in person if they are on site and we can open the bridge line for the off-site folks to participate. This is primarily focused on the project team itself, and members come and go depending upon what phase of the project we're in.

Second, I'd asked Robert to accelerate our project review meetings from bi-weekly to weekly. I think our best opportunities to address problems will come when we recognize a problem early on, and this will give us the added advantage of becoming more comfortable talking to one another and socializing viewpoints before they become conflicts.

If you have other recommendations or thoughts regarding this, please feel free to contact me at your earliest convenience.

Thank you.

\$TUA: 5BF7D43E827DFDAF862577DD00773774

After far too much deliberation, I have decided to postpone the governance workshops until after January. Planning week 2 is scheduled for 1/4 thru 1/7; workshop 1 & 2 scheduled for the week of 1/10 - 1/13; the alignment workshop scheduled for 1/17, and the recommendations due on 1/25. I believe the new administration will have much more interest in the governance model than they will with the nuts-and-bolts of the financial data and inventory, and some of the the draft report of recommendations can be used in the workshop meetings. I understand this will push the second draft which will include the governance recommendations to late January or possibly early February.

I appreciate everyone's participation in my deliberations, and apologize for the delay in making a decision. But I believe this could have significant influence over how the proposal is perceived and ultimately to the success of the overall project.

Sincerely,

Alex Z. Pettit

If it comes down to it, I'll buy them all pizza from my own wallet.

Tried to call you back, Pat dropped in to talk to me about some open source problems we're having. My technical folks don't really understand the concept of open source, they seem to think you can call a vendor and get support so they're calling the folks I gave them at Brown who wrote the stuff for help and of course the Brown folks are helpful but a little puzzled why we seem to not comprehend the "open source" model.

But I digress. Hope things are well with you.

Subject: Meals

Alex pulled from your lobbying policy. I highlighted the key areas, I believe we can provide lunch? Scroll down and get someone from the state to agree.

The terms "anything of value", "thing of value" and "things of value" DO NOT INCLUDE:

! a campaign contribution properly received and reported;

! any books, w ritten materials, audio tapes, videotapes, or other informational promotional material related to the performance of a state officer's or state employee's official duties;

! a gift that:

1) is not used, and

2) no later than thirty (30) days after receipt, is returned to the donor or delivered to a charitable organization and is not claimed as a charitable contribution for federal income tax purposes;

! a gift, devise, or inheritance from an individual's spouse, child, step-child, parent, step-parent, grandparent, step-grandparent, sibling, step-sibling, parent -in-law , sibling-in-law , nephew , niece, aunt, uncle, or first cousin or the spouse of that individual, if the donor is not acting as the agent or intermediary for someone other than a person covered by this provision;

! a plaque or trophy w ith a value that does not exceed tw o hundred dollars (\$200);

! modest items of food and refreshments, such as soft drinks, coffee, and donuts, offered other than as part of a meal;

! food and beverage consumed the occasion w hen participating in a charitable, civic, or community event, or at any event to w hich all members of the Legislature are invited, w hich bears a relationship to the state officer's or state employee's office and the officer or employee is attending in an official capacity;

! greeting cards and items w ith little intrinsic value, such as certificates, w hich are intended solely for presentation;

! loans from banks and other financial institutions on terms generally

OSF Open Rec. Capgemini -CIO Email Correspondence Aug -Oct 2010  
available  
to the public;

! opportunities and benefits, including favorable rates and commercial discounts, available to the public or to a class consisting of all state government employees, whether or not restricted on the basis of geographic consideration;

! rewards and prizes given to competitors in contests or events, including random drawings, which are open to the public; rewards and prizes from contests or events which are not open to the public are also excepted if the state officer's or state employee's entry into the contest is required as part of his official duties;

! pension and other benefits resulting from participation in a retirement plan offered by an employer or former employer of a state officer or state employee;

! anything which is paid for by the state government or secured by the state government under state government contract;

! any gift accepted by or on behalf of the state of Oklahoma or a governmental entity by the Governor under Section 381 et seq. of Title 60 of the Oklahoma Statutes. In order to be deemed accepted, the Governor must be notified in writing of any gift received by a governmental entity, or person on behalf of a governmental entity, within ten (10) days of receipt of the gift. Notice of acceptance must be received from the Governor within the next thirty (30) days. Upon lack of a response from the Governor within the thirty (30) days of receipt of the notice, the gift is deemed rejected and must be returned to the donor;

! anything for which market value is paid or secured by written contract to be paid by the state officer or state employee no later than 30 days of receipt;

! transportation furnished to a state officer or state employee for the purpose of assisting the officer or employee in the performance of the officer's or employee's official duties and from which the officer or employee receives only incidental personal benefits ancillary to said purpose;

! food, transportation or entertainment provided by a governmental agency or governmental enterprise of a foreign nation as a gesture of hospitality;

! prescription drugs or similar items given to the recipient for distribution to patients in need of treatment which are not used by the recipient;

! a meal or other food served at a meeting at which the state officer or state employee is an invited guest;

! any gratuity provided at a meeting, conference, or seminar by sponsors,

OSF Open Rec. Capgemini -CIO Email Correspondence Aug -Oct 2010 exhibitors, etc., the cost of which is not borne by a registrant to such meeting, conference, or seminar, and which is available to all registrants;  
and

! any single item with a fair market value not exceeding Ten Dollars (\$10.00) provided to a state officer or state employee during a calendar year; provided, if a donor provides more than one such item to a state officer or state employee during a calendar year, any such additional items shall not be subject to this exception.

So long as we've got that covered in the questionnaire, I'm good with asking them for it. I'm not sure if they'll be able to provide it in a breakdown by service, but we can ask.

Let me know.

Alex & Cynde:

Is it possible to capture the cost of the outsource engagement and if this is a fixed fee or T&M? It would be helpful if we could get the fees broken out by services provided. We should also ask for the service catalog and Service Level Objectives, Service Level Agreements for the services provided and if Disaster Recovery is included in the services agreement.

Having this information can help validate overlapping / duplicate services as well as the costs for these services.

I'll give this more thought and seek advice from other team members, as this is my initial thought.

Bob

Not sure what to do with ones like this. As they outsource the entire operation, I'd be inclined to just mark them as outsourced.

But I'd like to know what you think.

Thanks.

Alex -

Agency 359, Oklahoma Energy Resources Board (OERB) has no IT assets. Our agency is outsourced through an administrative contract and all assets and employees are the property, or employees, of the contract holder.

Please let me know if you need anything else.

Subject: CIO Study Assessment

Your agency will be participating in a statewide survey to establish an inventory of IT assets utilized in supporting each individual state agency's networks, servers and applications needed to support the agency's mission. Please see the attached document that helps outline the first steps of the CIO Study Assessment.

(See attached file: CIO Study Assessment - Survey Announcement.pdf)

Subject: IT Governance Placards for Review

The objective of the placards is to support the SCAN activities of the  
workshop. We want to present relevant information that can be used and  
support the workshop solution output. We are planning to also have some  
copies of articles that would be available for reading.

Please review and provide your comments by the end of the week.

Cyndi check and feels this is a time open for everyone.

I tried to reach Connie but I believe you said she was out today.

We would like to have a one hour review of the following governance items  
before we rest this phase of the project until late December:

Here are the following items we would like to review:

- IT Governance Trade Show Deck
- IT Governance Work Session Agenda - Revised
- IT Process Landscape Trade Show Deck
- IT Technology Trade Show Deck

Subject: Draft CIO Study Status - For Your Review

Alex:

I have attached a draft of the CIO Study for your review and approval. This would be the summary of what will be reported at tomorrow's CIO Meeting.

Your feedback is welcome.

Connie - Please hold pending approval from Alex

Thanks  
Bob

I need to push back the due date for the surveys until Monday, November 15. That two week delay will allow several agencies to complete end-of-month activities, I should have realized that end of month is a bad time for a due date. I realize that will potentially push the analysis back 2 weeks, but as analysis can be done remotely, it shouldn't require any changes to on-site staff time.

I realize this is an inconvenience for scheduling purposes, but much like the workshop schedule, this is very much a timing error and something I wasn't aware of when we set the schedule.

Please reach out to me either today or at your convenience.

Sincerely,

Alex Z. Pettit

Alex:

I will start looking at the impact this date change will have on the deliverables targeted for December, and January and advise you of the overall potential impact. I will need a couple of days since I am out on vacation this week, but I will commit to having the impact to you by Friday 10/29.

I understand and can appreciate the situation you are in and Capgemini and team will do our best to limit the impact this will have on the overall deliverables.

More to follow.

Bob

Subject: Bad news always comes on a Tuesday

I need to push back the due date for the surveys until Monday, November 15. That two week delay will allow several agencies to complete end-of-month activities, I should have realized that end of month is a bad time for a due date. I realize that will potentially push the analysis back 2 weeks, but as analysis can be done remotely, it shouldn't require any changes to on-site staff time.

I realize this is an inconvenience for scheduling purposes, but much like the workshop schedule, this is very much a timing error and something I wasn't aware of when we set the schedule.

Please reach out to me either today or at your convenience.

Sincerely,

Alex Z. Pettit

A good suggestion from Susan is to send out an update memo to the state agency heads and cabinet secretaries regarding the management study. I'd like to ask that we put together some kind of memo to go out late next week providing an update on the process, expressing appreciation from the agencies who provided tower leads, noting the assistance from the agencies who assisted with the BDNA scans, and calling out various changes we've made to the schedule to accommodate business needs.

Thanks.

Subject: Re: Fw: CIO Study - Due Date Extension

Just a thought...Tod has done a really good job of keeping me informed of the discussion and the direction of the larger effort. I would like to assume that all state agency heads have received the same quality of updates and summaries but imagine that is not the case. Perhaps a message from you to fellow cabinet secretaries with an update about what the agencies have been asked to do, etc., might be useful. My guess is we are not likely to have many more forums for the cabinet to gather until the change in administration...then you will have to get to know the new appointees for those of us who will be replaced.

Susan

Subject: Re: Fw: CIO Study - Due Date Extension

I do hope so. I am doing my best to communicate, and I've not quite figured out all the forums I need to use. But it hasn't been from a lack of trying, just a gap in my knowledge.

If the study didn't have to be independent, I would have taken a much different approach. But that is what the bill required, and so that is what I'm doing. I really do appreciate the feedback, and if you can suggest any other ways I should be communicating, I do appreciate your advice!

Thank you.

Alex

Subject: Re: Fw: CIO Study - Due Date Extension

Actually, it was just under six figures, but that is a good estimate.

When the survey was designed, we solicited participation from DHS, DPS, OneNet, DOC, and many other agency subject matter experts to craft the instrument. Many superfluous questions were eliminated, and some refined questions were incorporated. Striking the right balance between generalized answers and too much granularity was not easy for these groups to agree upon. The expectation is to identify not only where we have opportunities to leverage common assets but also to get some idea as to the "unfunded future costs" (Garner group's wording) for technology that is soon to need upgrade or is currently unsupported.

In-house staff time (I would assume) is tracked by agency. Here in OSF, the time sheet system is set up with a project code for the study, but I know payroll and time tracking is not a shared service across agencies, so I cannot speak to how it will be tracked state-wide. Time sheets and project tracking are common business processes I expect to be addressed in the study, as the dissemination of these services does make it difficult to relate activity across the state.

Finally, I would like to offer any assistance I can to Tod. I do appreciate the assistance, and the burden of having to do a survey in addition to the daily support requirements essential to your office.

Sincerely,

Alex Z. Pettit

Alex,

I have asked Tod wall, our IT director, to track the amount of staff time required to complete this survey. Frankly, I was surprised by the extent of the information agencies have been asked to produce. What I do know is that within this agency, approximately 1/8 of our staff has had their time redirected to this project. That has an impact.

How will you account for the total cost of in-house staff time directed to complete the assignments? will that be reflected in the total project cost? I seem to recall the original contract cost is six figures.

Thanks.  
Susan

Sent by: Connie.Holt@osf.ok.gov

Based on your overwhelming response to the CIO Study Survey Reminder that went out Monday morning, we have acknowledged that several agencies are trying to balance the added demands of completing the survey by this Friday with their existing workloads required to support their agencies day-to-day activities. We have reviewed the situation internally and have agreed to extend the deadline until 11/15 in order to allow the agencies ample time to complete the survey without compromising quality of the materials submitted or causing the daily support activities within the agencies to suffer.

We are, therefore, officially extending the deadline until Monday 11/15 for all surveys to be completed and returned to the OSF SharePoint site.

We appreciate everyone's efforts to date and will continue to work with you to provide support and clarification of the survey materials through 11/15. For the agencies who have already completed the survey, my thanks.

Thank you for the update. I put up a few of the items on my blog for the week, I'm looking forward to the FAQ sheet for next week.

When we have the opportunity to schedule it, I would like a walk-through of the governance workshops again with the updated materials so that I have a better understanding of who will present what and how. No hurry on that, November or December is fine, I would just like to walk it through before January.

Thanks.
