Telecommunications

- Wired and wireless networks • Wide Area Networks • Metropolitan Area Networks • Local Area Networks • Voice over IP
- Full telecommunications systems engineering, design, installation, and support • Network Operations Center (NOC) with capabilities as a Network Services Provider (NSP) on-site for hosting and management of computer resources

Specific examples of our telecommunications experience include:

The Robeson County, N.C. Sheriff's Department network contract which included the design, installation, and implementation of a 192 workstation network including personal computers running the Windows 2000 operating system, a mainframe computer, centralized patch panel, Cisco 3524 and 3548 routers, and over 13,000 feet of CAT 5e (enhanced) cable and fiber optic cabling. The systems is up and operating and certified at 100 Mbits.

Commercial contracts which include operating a rural ISP and telephone company and providing wireless internet services for businesses in two North Carolina cities. Wave Technologies' ISP provides telephone dial up and wireless internet services for over 600 clients including small businesses in Lumberton and Pembroke , N.C.

Wave Technologies' patented product line of disaster recovery/continuity of operations networking support tools is called the Universal Network and Internet Point-Of-Presence (UNI PoP™)

Technical Services

- Information Technology Services
- Unmanned Aerial Vehicles
- Command and Control System Engineering

Wave Technologies supports specific Naval Research Laboratory codes with data base management and contract review service along with financial SETA support. WTI developed a database that provided a management tool for all of the software development and consultation services being provided by a series of independent companies. We also provided purchasing support for technical hardware and networks and provided support for technical document management.

We support command and control system architecture and engineering for a national intelligence agency and for the LEWK ACTD.

Wave Technologies supports database maintenance at the Defense Threat Reduction Agency (DTRA) as a subcontractor

to CSC/DynCorp._

Certified Engineering
